Stun Guns

Stun Guns are a nonlethal self defense weapon that are an effective device used to subdue a person. Stun Guns work on a principle where high voltage pulses are applied to a person's muscle causing them to be vigorously exercised. The result of a stun gun is instant fatigue, weakness and loss of balance. The stun gun victim will be weak, lethargic, and disoriented for several minutes allowing sufficient time for a person to escape.

Most states now equip police officers with stun guns. They find it is a safe way to control people who are uncooperative, but are not actually threatening an officer's life. Physically restraining an out of control person can cause injuries to the officer or suspect. Stun guns have proven to be an alternative to the use of deadly force. During police training, officers who allow themselves to be stunned report receiving the worst pain they have ever experienced. This means that even after an attacker recovers from the effects of a stun gun, they are not likely to risk getting stunned again.

Stun Guns are ideal protection for a women or anyone concerned with being physically overpowered by an attacker. They should not be used to defend yourself against an attacker with a firearm or knife. To use a stun gun, hold the electrodes firmly against a muscular area of the attackers body such as a shoulder, thigh, or buttocks. You will not feel a shock even if you touch the person being stunned. To completely subdue the attacker, the stun gun must be continuously applied for a few seconds. More time is required if the person is large, or you are using a low voltage model.

D&D Security Products offers stun guns ranging from 1 million volts up to 11 million volts for maximum security.
SMACK Personal Stun Gun

The SMACK is about half the size of a standard stun gun, but is just as powerful; rated at 5 million volts* It has a powerful LED flash light, a safety switch, a nylon holster, a key ring, is rechargeable, and it has a rubberized coating making it easy to grip.

Slide the safety switch up and a red indicator will light showing the stun gun is energized. Press the lower button to activate the LED Flash Light, or press the upper button to activate the Stun Gun.

SG86 Smack Personal Stun Gun

SG86P Smack Personal Stun Gun  Pink

The SMACK stun gun has a built in charger. Just slide out the prongs and plug it into any 110VAC wall socket.

Also available in Pink with a pink leather holster

A Nylon Holster is Included.

Note: Due to equipment limitation, our test lab has been unable to verify the manufacture's voltage rating. However, it's output is comparable to similar models having the same rating.

11 Million Volt Black Out Stun Gun

Our most powerful stun gun with 11 Million Volts* of power while only 3.5” tall. It's small enough to fit inside your shirt pocket and it's rubberized shell makes it easy to handle and grip.

It has a bright LED flashlight that can disorient an attacker if directed into the eyes and a leather holster with a belt clip. Both the light and stun gun can be used while inside the holster.

It has a wrist strap with an optional disable pin to prevent the stun gun being used against you if it is taken from you. It also has a safety switch to prevent accidental discharge and a red LED indicating the stun gun is charged and armed.

SG91 11 Million Volt Rechargeable Stun

SG91P 11 Million Volt Pink Rechargeable Stun

To recharge, just flip out the AC prongs and plug into any wall socket.

Also Available in Pink
Police Force Tactical Stun Flashlight

Tactical flashlights have been used by law enforcement and the military for years. When confronted with an attacker, hold the flashlight in your fist pointed at the attacker. Shine the light directly into the attacker's eyes. The focused white light will temporarily blind the attacker. While the attacker is unable to see, strike the attacker in the face with the serrated end of the flashlight causing extreme pain and disorientation.

SG82 Tactical Stun Flashlight

Made from military grade aluminum alloy, the police force tactical stun flashlight is designed for rugged durability. Use it as a utility flashlight when you are outside in the dark or use it as a 5 million volt stun gun if you run into trouble. It has a safety switch to prevent accidental discharge, a nylon wrist strap, etched diamond texture handle for a sure grip, a nylon holster with a belt loop, and a built-in recharger with a recharging cord.

8 Million Volt Rechargeable Stun Gun

One of our most powerful stun gun with 8 Million Volts of power while only 3.5" tall. It's small enough to fit in a shirt pocket and it's rubberized shell makes it easy to handle and provides a firm grip. It comes with a leather holster with a belt clip, and a bright LED flashlight that can disorient an attacker if directed into the eyes. It has a wrist strap with a disable pin to prevent the stun gun being used against you if it is taken from you during a struggle. It also has a safety switch to prevent accidental discharge and a red LED indicating the stun gun is charged and armed.

SG89 8 Million Volt Rechargeable Stun Gun

To recharge, just slid out the AC prongs and plug into any wall socket.

SG89P 8 Million Volt Rechargeable Stun Gun Pink

Also Available in Pink

*Note: Due to equipment limitation, our test lab has been unable to verify the manufacture's voltage rating. However, it's output is comparable to similar models having the same rating.
5 Million Volt Rechargeable Stun Gun

It packs 5 Million Volts* of power while only 3” tall. It's small enough to fit inside a pack of cigarettes and it's rubberized shell makes it easy to handle and grip. It comes with a leather holster with a belt clip, and a bright LED flashlight that can disorient an attacker if directed into the eyes. It has a wrist strap with an optional disable pin to prevent the stun gun being used against you if it is taken from you. It also has a safety switch to prevent accidental discharge and a red LED indicating the stun gun is charged and armed.

To recharge, just flip out the AC prongs and plug into any wall socket.

*Note: Due to equipment limitation, our test lab has been unable to verify the manufacture's voltage rating. However, it's output is comparable to similar models having the same rating.
10 Million Volt Jolt Stun Gun

Economical yet powerful. This stun gun is rated at 10 Million volts of stopping power. While only 3.5” tall. It has a rubberized shell to make it easy to handle and grip. It comes with a bright LED flashlight that can disorient an attacker if directed into the eyes. It has a wrist strap with a disable pin to prevent the stun gun being used against you if it is dropped or taken from you. It also has a safety switch to prevent accidental discharge and a red LED indicating the stun gun is charged and armed. To recharge, just slide out the AC prongs and plug into any wall socket.

SG92 10 Million Volt Jolt Stun Gun

SG92P 10 Million Volt Pink Jolt Stun Gun

Also Available in Pink

Perfume Protector

Looks like a typical perfume canister but when the cover is removed it becomes a self defense weapon. It’s compact size makes it easy to conceal giving you the element of surprise. Touching an attacker and pressing the stun button delivers an incapacitating and painful high voltage shock giving you the advantage in a struggle with an attacker or the opportunity to escape. Many times just the sound and sight of the electrical discharge across the electrodes will make an attacker back away. It has a safety switch and a small but bright LED flashlight. It is rechargeable and comes with a small recharging cord. It is an ideal gift for someone you would like to protect.

SG85 Perfume Protector

The same size as a perfume canister

With Cover on

Recharging Cord
Cell Phone Stun Gun

This is the most authentic looking cell phone stun gun available. It packs 5,000,000 Volts using lithium technology. It comes with an actual cell phone leather case with a belt clip. It has a safety switch to prevent accidental discharge. It also has a built in flash light to help you see in the dark.

**SG83 Cell Phone Stun Gun**

It is the actual size of a modern cell phone that can easily be carried in your pocket or purse.

**BA02 3-Pack CR2 Lithium Batteries**

The Cell Phone Stun Gun requires three CR2 Lithium batteries, sold separately.

**SG90 3.5 Million Volt Cell Phone Stun Gun**

It looks like a real cell phone, but it's a 3500KV Stun Gun. Only about 4” in height, it is the size of a actual cell phone. What appears to be a camera lens on the upper right corner is actually a bright LED flash light to help you see in the dark. This stun gun is fully rechargeable and comes with a small recharging cord. It also comes with a protective black cloth pouch. There is a safety switch to arm the stun gun and another button to discharge it.
Stun Batons

A Stun Baton works on the same principle as a stun gun, but it allows you to keep more distance from your attacker. To use a stun baton, stick the electrodes against the attacker and press the trigger. Unlike a stun gun, where your strategy is to hold the gun against your attacker until he is subdued, using a stun baton will cause the attacker to jump away when stunned. Continue to stick and stun, forcing the attacker to back away until he flees or falls. Again, unlike a stun gun, a full size stun baton will give you a better chance defending yourself against a knife attack.

All of our stun batons have electrodes in the shaft that will prevent an attacker from taking it away from you during a struggle. If the attacker grips the shaft, just press the trigger. No one can hold on to the shaft while they are being stunned. You can also deliver a jolt to an attacker by holding the shaft against his body. Our stun batons are made of durable hard plastic, giving you additional protection when used as a club.

Stun batons are preferred by security professionals. We sell them to security guards, night watchmen, night club bouncers, and body guards. They are an intimidating weapon, and when they are not concealed, they can help avoid confrontations.

7 Million Volt Night Stick Stun Baton

Put More Distance between you and your attacker

This is a full size stun baton. At 18 inches, it is one of the longest stun batons available. It is rated at 7 million volts and is fully rechargeable. It has a bright LED light for use at night and comes with a nylon holster with a belt loop. It has a rubberized armor coating to protect the unit and ensure a firm grip. It has electrodes along the shaft to shock anyone who tries to take it away from you in a struggle. It has a safety switch to prevent accidental discharge and a LED indicator to show the stun baton is charged and armed.

SG87 7 Million Volt Rechargeable Stun Baton

Includes a powerful flashlight

Includes recharging Cord
3 Million Volt Expandable Stun Baton

Press a button and this stun baton will instantly snap to a length of 21” with authority. Touch the victim with the electrodes or electrified shaft to deliver a 3,000,000 Volt jolt. This stun baton will retract to 12” when not in use, and can be used as a mini stun baton when retracted. For additional security there is an integrated 130dB alarm to scare off an attacker or animal and summon help. Includes Strap, Safety Switch, Nylon Holster, and AC Adapter.

Includes a powerful flashlight

1,200,000 Volt Lightning Rod

The Lightning Rod Stun Pen and Flash Light is the most powerful Stun Pen available. Only 7 inches long. Small enough to carry in your hand or use the holster to wear it on your belt.

The Lightning Rod Stun Pen includes a Bright LED Flashlight, safety switch, holster, protective cap, and recharging cord. It has the visible spark and sound of stun gun that will intimidate an attacker and 1,200,000 volts to stop an attacker. The built-in LED flashlight provides a convenient source of light whenever you need it and eliminates the need to carry a bulky flashlight.

Includes a powerful flashlight

The lightning rod is rechargeable. To recharge, use the cord to plug it into any standard wall socket.
Tasers® Devices

Police studies show the TASER device will incapacitate faster than a 9mm hand gun.

The TASER C2 made by TASER International, can stop a threat up to 15 feet away, allowing you to protect yourself and your family from a safe distance. You can also use the TASER brand stun device as a contact stun gun. TASER technology has proven itself as the safe self-defense choice with over 500,000 users worldwide. TASER technology is supported by dozens of independent medical reports attesting to it's general safety. Unlike conventional weapons, a TASER device can work anywhere on the body, making it easier to stop an assailant than other self-defense products. Just point and push a button. TASER devices are field proven to be over 95% effective in actual law enforcement encounters by over 10,000 police agencies in 40 countries.

The Neuromuscular Incapacitation technology  NMI® of the TASER Stun Device is the key technology to disable even the most aggressive attackers. NMI temporarily overrides the central nervous system, thus disrupting control of the skeletal muscles. Compressed gas launches two penetrating probes up to 15 feet to deliver a powerful knockdown punch. Once attached to the target, the probes use sophisticated electronic technology called Shaped Pulse™ that utilize a high voltage leading edge to penetrate barriers such as clothing followed by a lower voltage stimulation pulse to cause neuromuscular incapacitation. No stray bullets, no deadly accidents, even mistakes are not fatal.

Civilian Model

The TASER C2 is the newest product from TASER International designed for personal protection. It utilizes the same technology as their proven law enforcement models.

The TASER C2 is a self-defense electronic control device. Electronic Control Devices (ECDs) use propelled wires or direct contact to conduct energy to affect the sensory and motor functions of the nervous system. The TASER C2 uses a replaceable cartridge, containing compressed nitrogen, to deploy two small probes that are attached to the TASER C2 by insulated conductive wires with a maximum length of 15 feet. The TASER C2 transmits electrical pulses along the wires and into the body affecting the sensory and motor functions of the peripheral nervous system. The energy can penetrate up to two inches of clothing.

The TASER C2 has an integrated LED light for use in low light situations. It has a safety cover to prevent accidental discharge and a lithium battery good for up to 50 uses. The TASER C2 has an integrated Laser that will show the spot where the probes will hit when it is fired. It adds an element of intimidation by signaling to the assailant he is about to be taken down.

The TASER C2 Gold Kit is the same product as the C2 Basic Kit (AT30) but it includes an extra replacement cartridge and sturdy holster

The TASER Gold Kit comes in four colors. Black, Aqua, Silver, and Pink.

TASER® is a registered trademark of TASER International, Inc.
The Dual Defense System, like a Taser, is a long range stun gun that has nitrogen propelled electrodes that can strike a target up to 17 feet away. Even if the probes miss the attacker, the used cassette can be popped off and a new cartridges snapped on in seconds and the Dual Defense System is ready to fire another set of electrodes. Even without a replacement cartridge, the Dual Defense System is still a fully functional stun gun that can protect you in close situations. The Dual Defense System comes with all you need. It includes the base unit which can also function as a hand held stun gun, one cartridge which contain the electrodes that are fired out, a practice target, and a 9 volt battery. Approx. dimensions are 6" x 2 3/4" x 1 1/4 ". 100,000 volts.
Shipping

Most orders are shipped by the US Post Office Priority Mail the same or next business day providing the products are in stock.

Delivery time by Priority Mail is usually 2 business days, but not guaranteed. Delivery by Express Mail is usually one day, but not guaranteed.

There is a minimum shipping charge of $7.45 on all orders shipped within the Continental US. The shipping amount is determined by weight and is higher for heavy or multiple items. Shipping to Alaska, Hawaii, or Puerto Rico is an additional 15%.

International orders are shipped by International Express by the Post Office. Orders to Canada and Mexico are shipped by Global Priority, First Class, or Express depending on the cost.

Pepper Spray can not be shipped by Express Mail. Orders are tracked using Delivery Confirmation or Express Tracking.

International

We ship to all countries served by the US Post Office

We can not accept credit cards for orders that are to be shipped outside the US, or credit cards that have a billing address outside the US. All international orders must be prepaid by:

- Wire Transfer,
- Bank Draft,
- International Money Order,
- Western Union

Mail money order or bank draft to:
D&D Security Products
PO Box 5863
Rochester, MN. 55903

You are responsible for any duty charges and your order clearing customs. No credit is given for orders rejected by customs.

We can not export pepper spray, stun guns, stun batons, or air tasers outside the US.

Terms & Conditions

It is the responsibility of the buyer, and not the seller, to ascertain, and obey, all applicable local, state, and federal laws in regard to the purchase, possession, and use of any item offered by D&D Security Products and Guard Dog Defense. If you are in doubt, consult your local or state law enforcement before ordering.

Absolutely no sales to minors.

By placing an order, the buyer represents that the products ordered will be used in only a lawful manner, and that he/she is of legal age and the buyer agrees with the terms, conditions, and policies documented on this web site.
**Warranty**

* D&D Security Products warrants all products to be defect free at the time of purchase. If a product is received defective, D&D Security Products will replace that product free of charge.

* A Manufacture's warranty covers all products that become defective after the original purchase and during the product's warranty period. As an authorized dealer, D&D Security Products handles all warranty replacement for the manufacture for a nominal fee. See our return policy.

* Warranty returns must be authorized, see our return policy

* The warranty is void if the product is issued, modified, or physically damaged.

---

**Return Policy**

**Defective Product Returns:**

* Products received defective will be replaced for free. Buyer must request a return authorization within 5 days of receiving the product to receive a free replacement.

* Products that become defective after 5 days but within their warranty period will be replaced for a service fee of $15.00 to cover shipping cost to and from the manufacture and return shipping to the customer. This fee may be higher for large or multiple items or items being shipped outside the Continental US.

* Products may be returned for a credit if they are received defective or become defective within 30 days from the date of sale. Credit is for the product cost only, shipping charges are not refundable. A 25% or a minimum of $10.00 handling fee is added for defective products returned for credit. After 30 days from date of sale, and within the warranty period, defective products can be returned for replacement only.

* Pepper Spray may not be returned unless received defective.

* If a product is returned as defective, however Seller's test lab determines the product not to be defective, it will be returned to the Buyer for a shipping & handling fee.

* No replacement or credit will be offered for products that have been misused, modified, or damaged.

* If the product being returned for a replacement is no longer available. If possible, a product of similar or higher value will be substituted or a credit will be issued at the Seller's discretion.

* Items sold as a close out sale can only be returned if defective.

**Non Defective Product Returns:**

* If, for any reason, Buyer is not satisfied with the product received, Buyer may request to return it for a credit. If the request is made within 10 days of receiving the product and it is returned complete, in new condition, and in it's original packaging, a credit will be issued for the product cost only less a 25% restocking fee.

* If Buyer requests to return a non defective product after 10 days and within 30 days of the date of purchase, and it is returned complete, in new condition, and in it's original packaging, a credit will be issued for the product cost only less a 50% restocking fee.

* No credit will be issued for non defective returns after 30 days from the date of sale.

* If the wrong product is shipped to the Buyer by mistake, it will be replaced at no charge providing it is returned in unused condition and in it's original packaging.

* If an item is un-deliverable and returned to Seller by the carrier, a credit to the Buyer will be issued for the product cost not including shipping charges. If the delivery was not completed because it was refused by the Buyer, a 25% restocking fee will also be subtracted from the credit.

---

**RMA**

**How to request a return authorization (RMA):**

* E-mail returns@ddsp.com. State the item being returned, the reason for the return and order number or order reference number found on the Sales Receipt. The Buyer will be issued an RMA number by return e-mail along with return instructions.

* An RMA is valid for 10 business days. If the product is not returned within those 10 days, a new RMA must be requested.

* The RMA number must be printed on the outside of the package

* Seller is not responsible for returned items lost or damaged by the carrier.
